

Matched terms

Cut the following words and definitions individually and give them to the small groups of pupils to connect the keywords with its definition. Print enough copies so that students can work in groups of 3

Or alternatively print page 2 and get pupils to draw a line between the word and description.

They could even tick off the keywords as they hear them in the presentation!

Wilding	The idea behind restoring nature
Habitat	The home of an animal or a plant
Compost	Rotting food waste
Landfill	A place where we bury household rubbish in the ground
Recycling	Sorting all the rubbish at home into different bins
Pollution	Waste products escaping into the natural environment (land, air, water and sea)
Biodiversity	The variety of all animal and plant species
Restoring nature	Helping to repair a habitat which has been damaged
Reusing	A way to turn rubbish into new things
Household waste	All the waste made at home

Draw a line between the keyword and its definition / meaning

The home of an animal or a plant
